October 2022 Newsletter

Performance-Based Cybersecurity

Critical infrastructure organizations and cybersecurity leaders from both the public and private sectors are recognizing that protecting critical assets is a journey that we approach with different maturity levels. This is an important acknowledgement since it enables organizations to adopt security measures incrementally and to track their performance over time. This may explain why in October, not one but **two** different performance-based cybersecurity publications were released.

First, CISA launched the Cross-Sector Performance Goals (CPGs) to close the gap between fundamental security protections that every organization should adopt and the lack of consistent standards and cyber maturity across critical infrastructure sectors. Second, TSA published Security Directive 1580-21-01A to enhance the cybersecurity of passenger and **freight rail transportation** through a layered approach. Both documents include the goal of network segmentation policies and control that Network Perception strongly supports through our mission and technology.

Network Perception is thrilled to announce our recent security technologies integration with Check Point Software Technologies, a leading provider of cyber security solutions globally.

This will make it possible to ensure that OT firewall environments are properly configured and continuously verified for the protection of critical assets.

This past month, the Network Perception team traveled coast to coast to attend 6 total OT cybersecurity conferences! Check them out here:

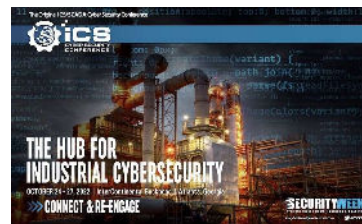

GridSecCon

10/17/22-10/18/22
Virtual

Three Rivers Information Security Symposium (TRISS)

October 14th, 2022
Monroeville, PA

ICS Cybersecurity Conference

10/24/22-10/27/22
Atalanta, GA

WECC Reliability & Security Conference

10/25/22-10/27/22
Scottsdale, AZ

ManuSec

11/2/22-11/3/22
Chicago, IL

**Florida Public Power
Cybersecurity Summit**

11/2/22-11/3/22
Orlando, FL

For Your Calendar

**17th Annual API
Cybersecurity Conference
for the Oil and Natural
Gas Industry**

November 8th-9th, 2022
Woodlands, TX

**Control Systems
Cybersecurity of America**

December 13th-14th, 2022
Orlando, FL
