Cybersecurity Awareness Month

October marks Cybersecurity Awareness month where government and private industries alike raise awareness about digital security and encourage everyone to protect their personal data from the increasingly common cyber attacks.

However, cybersecurity doesn't just apply to IT. As President Joe Biden highlighted in "[The Proclamation of Cybersecurity Awareness Month](#)", it's equally important to "safeguard our Nation's critical infrastructure from malicious cyber activity" because cyberattacks can destroy many critical services that we trust and rely on every day.

Network Perception helps OT organizations beat the odds of a devastating attack with NP-View, our leading platform for verifying and visualizing the network security of mission-critical OT. We help you protect your assets by first helping you understand your vulnerabilities-and provide you with the best-in-class solutions such as what [Top 5 Network Access Vulnerabilities](#) every owner/operator should know.

It's never too early - or too late, to protect your vulnerable assets with Network Perception.
