Top 10 2023 Cybersecurity Trends

Start your new year off right with Cybercrime Magazine's Top 10 Cybersecurity Trends to watch out for in 2023.

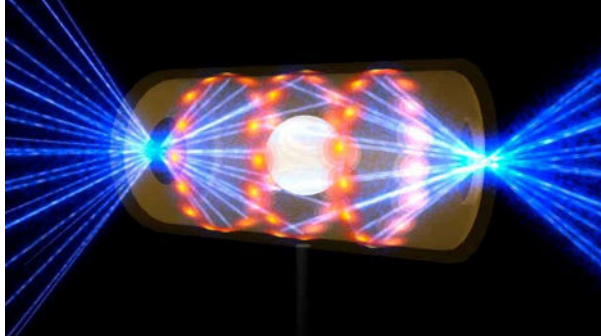

[Get The Guide](#)

News Update

This month, U.S. scientists made history by successfully producing a nuclear fusion reaction resulting in net energy gain.

According to Network Perception's Head of Cybersecurity and Compliance Don Miller, here's how to implement this milestone discovery into power plant usage in 5-10 years:

1. Engineer a container to contain the energy generated by the fusion process.
2. Engineer a retrofit for existing plants or build new plants.
3. Build new plants that are less cost-prohibitive (currently in the hundreds of billions of dollars).
